PROFILE

Self-motivated and proactive with extensive experience and demonstrated ability to provide operational excellence in the provision of support in all aspects of the daily operations involved in the department.

With a positive “can do” attitude I have most recently be responsible for Senior Radiographer in Hong Kong Medical Centre (Full Time). With a well-developed matrix of skills including monitoring staff training and performance, running of imaging machines and computer systems operations. I have demonstrated my ability to safely and effectively perform machine operations in Computed tomography, Mammography, X-Ray, DEXA, fluoroscopy machines, PACS, etc. I have also a Mammography course in Adelaide in 2013 to 14. I am now also studying for webpage design and training and assessment courses.

I offer a potential employer a high level of energy and enthusiasm and look forward to new experiences.
